

"I'm With You"

Jessica Campbell/Peter Groenwald

Verse:

It was you that I was looking for
when I walked into every crowded room
It was you that I was waiting for
When my heart was feeling oh so blue

Pre-Ch:

Just like that, so fast, I never saw it coming at me
A hello and here we go, it happened so easily

Chorus:

Doesn't matter where you're going, no
Doesn't matter where you've been
All that I know is I'm glad you're here now
What took you so long to let love in
Whatever happens I will never ever leave your side
Bring on the rain & baby I'll be fine
As long as I'm with you, with you

Verse:

Nothing better than an open door
Whenever I've got something to say
You're teaching me that I can be much more
that I am better than my bad mistakes

Pre-Ch:

Just like that, so fast, we were making memories
A hello and here we go, you've made up mind for me

Bridge:

You can be my knight in shining armour
I will be your girl forever
I don't need to know what's happening tomorrow
As long as I can go with you
